TEST REPORT NO 192876/23/GDY/Z1 Replaces test report no. 192876/23/GDY of 17.05.2023

Total polyunsaturated fatty acids (PUFA) ¹⁾	mg/capsule	663 ± 86
Sum of trans fatty acids isomers	mg/capsule	4 ± 1
Total Omega-3 fatty acids ¹⁾	mg/capsule	622 ± 81
Total Omega-6 fatty acids ¹⁾	mg/capsule	40 ± 5
Total Omega-9 fatty acids ¹⁾	mg/capsule	122 ± 16

- 1) Results of individual summs of unsaturated fatty acids do not include the content of trans fatty acids.
- The lower limit of the measuring range of the accredited method, which is also the limit of quantification set by the Laboratory.

Fatty acids profile: Identification of the change: test result

Authorized by:

Aleksandra Makowska, Senior Analysis Specialist, Classical Analysis Laboratory Justyna Sokołowska-Koniecko, Analysis Expert, Gas Chromatography Laboratory Marta Skulska, Analysis Expert, Sample Homogenization and Physical Analysis Section

The test report bears the certified electronic seal of J.S. Hamilton Poland Sp. z o.o.

Laboratory address:

Chwaszczyńska 180, 81-571 Gdynia

The results refer only to the samples received. When a measurement uncertainty is given, it is an expanded uncertainty estimated for a coverage factor k=2 at 95% confidence level and is not including sampling uncertainty, unless otherwise stated. When the conformity is stated J.S. Hamilton Poland Sp. z o.o. applies the simple acceptance decision rule in accordance with ILAC-G8:09/2019, unless otherwise reported. If the "result" column of the accredited method contains a record: "c" or ">", it means, that it is the test outcome directly related to the lower or upper limit of the measuring range of the accredited method, whereas the given expanded measurement uncertainty relates only to the lower or upper limit of the measuring range of the accredited method, whereas the given expanded measurement uncertainty relates only to the lower or upper limit of the measuring range of the accredited method, whereas the given expanded measurement uncertainty relates only to the lower or upper limit of the measuring range of the accredited method, whereas the given expanded measurement uncertainty relates only to the lower or upper limit of the measuring range of the accredited method, whereas the given expanded measurement uncertainty relates only to the lower or upper limit of the measuring range of the accredited method, whereas the given expanded measurement uncertainty, unless otherwise reported. If the "result" column, which is accredited method contains a record." "C" "", it means, that it is the test outcome in the "statement of conformed measurement uncertainty, unless otherwise reported. If the "result" column, which is accredited method contains a record "C" or "", it means, that it is the test outcome. The accredited method contains a record "C" or "", it means, that it is the test outcome in the accredited method contains a record "C" or "", it means, that it is the test outcome in the accredited method on ""." It have "call the "state" of ""." It have the accredited method contains a record "c" or "", it means,
